Earth lies in grave peril!
Winged terror screams across mute space. Legions of creatures bombard Earth's final outpost: Moon Station Tranquility. Intercept and destroy these garrisons which breed destruction - or Earth is doomed!
Survive the demon attack - then go on the offensive! Your Laser Cannon lifts off the lunar surface. You seek to track down Pandemonium, flagship of the Demon Armada. Its awesome bulk seems to fill space with menace. It spews vast armies of eternal night from its fiery Core.
Attack! End the tyranny of the Demon Armada. You must prevail against monumental odds.
Winged warriors and tentacled terrorists from the Demon Armada shower the moon with devastating weaponry. Only your Laser Cannon stands between them and their planned conquest of the Earth! Annihilate successive waves of demons. Then lift off in relentless pursuit of Pandemonium, the demon flagship. Outmaneuver or destroy galactic gangs of suicide patrollers flying straight from the Core of Pandemonium.

Erode the flickering shield that protects the demon base. A direct shot from your Laser Cannon through the revolving Window of Vulnerability and into the Core of Pandemonium will end their foul revolt – but not for long.

Flushed with victory, you return to the lunar surface. But you’re not safe yet. Advanced waves of demons continue to pummel Moon Station Tranquility. And the Demon Armada keeps coming.

Can you destroy them this time?
And next time?
How long can you endure this punishing blitz? How many demon bases can you destroy?
Earth’s safety hangs in frail balance. You must defeat them!

Accumulate reserve Laser Cannons. You begin with 3.

* Every time a demon hits you, you lose a Laser Cannon. A new Laser Cannon from your reserves will replace it.
* When hit, your new Laser Cannon appears in the middle of the screen.
* When your Laser Cannon reserves reach zero, another alien hit will vaporize you.

**Note:** To change the location of Laser Cannon reappearance: press right or left on the disk before the new Laser Cannon appears. Laser Cannon will reappear at right or left of screen.

**Tracer Shots**
* Tracer shots, once fired, follow the location of the Laser Cannon. Shoot one and direct it anywhere by shifting the position of your Laser Cannon.

Moon Base Tranquility Defense

Moon Station Tranquility has intercepted signals from Demon Base Pandemonium. Use this intelligence wisely.

Demon squadrons are of 4 types:

- Winged Warriors
- Tentacled Terrorists
- Bound Bombers
- Suicide Patrollers (only at Demon Base)

- Earn 25 points for each Lunar Demon you destroy.
- Earn 25 points for splitting Tentacled Terrorists.
- Earn 1 point for each Suicide Patroller you destroy.

Demons fire 3 types of bombs:

- Pellet Pulverizers: concentrated bombs
- Jagged Juggernauts: they explode and scatter shrapnel. They appear after the first Demon Base has been destroyed.
- Heat-Detecting Detonators: these track your Laser Cannon and appear after the third Demon Base has been destroyed.

- All bombs gain speed and potency as you destroy more Demon Bases.
- Take calculated risks: Moon Station Tranquility has learned that when the last demon in a wave is destroyed, any bombs it may have dropped will be vaporized with it.
On the Offensive

Eliminate 3 full waves of descending demons. When – and if – you survive their assault on Moon Station Tranquility, go on the offensive.

Your Laser Cannon blasts off in pursuit of the demon flagship, Pandemonium.

• **Suicide Patrollers** defend Pandemonium. They fly out of its fiery Core.
  • Destroy them with Laser Cannon fire.
  • Or you can try to outmaneuver them. Avoid contact at all costs, or you’ll lose a Laser Cannon.
A flickering shield protects the bottom of Pandemonium.
Erode it with repeated Laser Cannon fire at any point along the length of the shield.
The Window of Vulnerability is exposed when the flickering shield disappears.
Place a Laser Cannon shot directly into the fiery Core of Pandemonium through the revolving Window of Vulnerability and the Demon Base will disintegrate before your eyes.
Earn 1000 points for each Demon Base you destroy.

Note: Your Laser Cannon shot must pass directly through the Window of Vulnerability and into the Core before you will have scored a direct hit.

Your Laser Cannon returns to Moon Station Tranquility.
Mission accomplished?
Not quite.
Hordes of deadlier demons begin a fresh assault!
Carry on!
