TO BEGIN
Turn power switch OFF, insert cartridge, turn power switch ON and press
RESET. MOUNTAIN MADNESS -SUPER PRO SKIING title screen appears.
Press any KEY or the DISC.

SELECT NUMBER OF SKIERS
Up to six skiers can compete for best downhill time. Press 1 to 6, then press
ENTER. Each skier is assigned a different color; each skier's time is shown in his
or her color.

SELECT GATE WIDTH
The downhill course is defined by pairs of flags, or "gates," that you ski through.
Select wide gates by pressing 1 (Downhill). Select more challenging narrow gates
by pressing 2 (Slalom). Select no gates, allowing you to choose your own path
down the mountain, by pressing 3 (No Flags). After pressing 1, 2, or 3, press
ENTER.

SELECT COURSE
Select from 32 built-in courses, each with its own obstacles and challenges, or
choose a new course, designed either by you or by the computer. Press 1 to 32 to
select one of the built-in courses (see below on previewing courses), press 33 to
have the computer design a new course ("helicopter skiing"), or press 34 to design
a new course yourself. After you make your selection, press ENTER.

PREVIEW BUILT-IN COURSES
You may preview any of the 32 built-in courses before selecting one. Press 1 to 32,
as described above, but before pressing ENTER, press the DISC. A map appears,
with the main characteristic of each course segment color-coded:
Green: Clear skiing
Dark Blue: Icy patches
Gray: Moguls (bumps)
Light Blue: Powdered (unpacked snow)
Warning: Only the MAIN characteristic is color-coded; for example, a green
segment may include a mogul, or a gray segment may include an icy patch. Also,
patches of ground do not appear on the preview!
Press the TOP and BOTTOM of the DISC to see the entire course. Press any
KEY to return to the SELECT COURSE SCREEN. Press ENTER to ski the
course; press CLEAR to preview or select another.

HELICOPTER SKIING
Pressing 33 followed by ENTER causes a new course to be created at random by
the computer. This simulates "helicopter skiing" - the thrill of a helicopter
dropping your ski party at the top of an uncharted mountain. (For the complete
sensation of uncharted territory, Helicopter Skiing should be selected after the No
Flags option, although you can still select Helicopter Skiing with Downhill or
Slalom gates.) The course is different every time you select this option.

CREATE YOUR OWN COURSE
Pressing 34 followed by ENTER displays the COURSE EDITOR SCREEN.
String together from 3 to 15 course segments to build a new course. Press the TOP
or BOTTOM of the DISC to display the 28 available segments, one at a time.
Press ENTER to add the displayed segment to the course; press CLEAR to erase
the last-added segment. Press 0 (ZERO) when done.
Note: The segments are color-coded by main characteristic as in PREVIEW
BUILT-IN COURSE, above. Each segment may contain other obstacles that will
only show up when you actually ski the course.

SELECT SLOPE
Enter the slope, from 1 to 15, for each skier in your party. The higher the slope, the
faster you accelerate down the course. Start with lower numbers until you have
mastered turning and jumping. Press ENTER after selecting the slope for each
skier.

PREVIEW COURSE
A map of the course now appears, color-coded as described in PREVIEW BUILT-
IN COURSE, above. Press the BOTTOM and TOP of the DISC to view the
entire course. When you are familiar with the course, press any KEY and get ready
to hit the slopes!

THE RACE IS ON
The first skier is in the starting gate. Press the DISC to start the clock and the
skier starts down the mountain!
YOUR CONTROLS
Each skier can use either hand controller. If more than two people are skiing, take
turns with the controllers.

**DISC** - Press **LEFT** and **RIGHT** side of **DISC** for "snowplow" turn (slows
you down).

**TOP SIDE KEYS** - Hold down while pressing **DISC** for "parallel" **POWER
TURN** (does not slow you down).

**BOTTOM SIDE KEYS** - Jump over obstacles.

Note: Hit certain obstacles or try to ski backwards and you'll fall! You'll get back
up automatically, but you'll have wasted precious time!

GATES
The left flag changes color for each gate you ski through. A 2-second penalty is
added to your time for each gate you miss. It's okay to knock over a flag as you go
through the gate, but it will slow you down. It's also okay to pass through a gate
from below; if you pass a gate to the side, turn, ski uphill into the gate, then turn
and ski back down.

TERRAIN & OBSTACLES
Learn to recognize the various obstacles. You can jump over some; some you have
ski around.

- **Trees** - Knock you down when hit.
- **Flags** - Slow you down when hit.
- **Icy Patches (dark blue lines)** - You can't turn on ice.
- **Powder (light blue dots)** - Slows you down.
- **Moguls (gray bumps)** - Knock you down.
- **Patches of Ground (brown spots)** - Knock you down.

BEST TIME WINS
Each skier has 3 chances for the fastest time. Skiers race in order through Heat 1,
2, then 3. The clock records the time, adding the 2-second penalty for each missed
gate.

The time for each run appears at the finish line. The best time so far appears at the
starting gate. After the third heat, the best time for each skier is shown. The skier
the lowest time wins. All times are shown in the color of the skier.
