The Empire's revenge has begun! Right now an army of Imperial Walkers is marching towards the Rebels' power generator on the Ice Planet Hoth. If they reach it, the entire Rebel base will blow sky high! To stop them, the Rebels must rely on missile-firing Snowspeeders. The Snowspeeders are quick and agile and in the hands of a skillful commander, they can destroy the mighty Walkers. So climb into your Snowspeeder and be prepared to meet the first of your deadly enemies!

**OBJECT**

To destroy as many of the Imperial Walkers as you can before they reach the power generator at the end of the battlefield—or before the Imperial Walkers destroy your fleet of Snowspeeders.

SETTLE THE CONSOLE CONTROLS

1. Make sure the cartridge is placed firmly into the cartridge slot.
2. Turn the OFF/ON switch to ON.
3. Press the ENTER button on the controller. You'll see "Players?" Press 1 or 2, depending on whether you're playing a one- or two-player game.

4. Then you'll see "Level?" Refer to the Game Selection Box for the level at which you wish to play. Press that level number.
5. Press ENTER and you're ready to play.

**THE HAND-HELD CONTROLLERS**

Use the directional disc on your hand-held controller to fly your Snowspeeder left, right, up and down. You can accelerate your Snowspeeder in all four directions as well. To slow it down, simply change direction. To fire your missiles press either of the two top fire buttons.
THE BATTLEFIELD

This is the battlefield on the Ice Planet Hoth. The entire battlefield is 15 TV screens wide. The radar band monitors the entire battlefield.

PLAYING

A Rebel commander receives 5 Snowspeeders per game. At the start of the game, the first Snowspeeder is displayed in the Ice Zone. The remaining "on deck" Snowspeeders are displayed at the top of the screen.

To start the action:

Fly your Snowspeeder down screen (move left) to meet the oncoming Walkers. The Walkers approach in a single file from left to right. They can bunch up behind one another but they can never pass one another. Although up to 5 Walkers can be seen on the radar band at a time, only 1 Walker will appear on the TV screen at a time.

Radar Band.

Use the radar band to keep an eye on the positions of all 5 Walkers and to see which Walker you're presently battling on screen. NOTE: When your Snowspeeder flies off one end of the radar band, it will reappear at the other end.

Remember: As soon as the lead Walker reaches the right end of the radar band, it blows up the power generator and ends the game. Just before this happens, however, you'll hear a warning sound and the sky will begin to flash.
DESTROYING THE IMPERIAL WALKERS

It takes 30 “hits” to the body to destroy an Imperial Walker. Each group of 8 hits (6 in the last group) weakens the Walker one stage and changes its color. Each color change means that the Walker is walking slower, firing less often, and aiming less accurately. An Imperial Walker may go through 3 color changes before it’s finally destroyed: from black to blue, red, tan, then POW! — it’s gone!

A Snowspeeder can fly around to the back of a Walker and attack from the rear. A Snowspeeder cannot weaken or destroy a Walker by hitting its legs.

There is a quicker way to destroy an Imperial Walker—by firing a missile into a “bomb hatch.”

BOMB HATCHES

Bomb hatches are orange squares that appear from time to time on an Imperial Walker. Hit a bomb hatch and it’s instant destruction!

When you destroy an Imperial Walker, a new one will enter the battlefield. Each new Walker will be even tougher than the last. It will walk faster, fire its missiles more rapidly, and aim its fire more accurately. Therefore, the longer you stay in the game, the more difficult it becomes.

ATTACK OF THE IMPERIAL WALKERS

Imperial Walkers fire deadly missiles at Snowspeeders. They even have the ability to “track” your Snowspeeder and can aim their missiles by raising or lowering their heads. They can fire at Snowspeeders approaching them from behind as well as head on.

DAMAGED SNOWSPEEDERS

When a Snowspeeder is hit by a Walker’s missile, it becomes “damaged” and its color changes to yellow. In a damaged state, each succeeding hit increases the chances the Snowspeeder will be destroyed. A Snowspeeder can take up to 4 hits before it’s destroyed. However, it can be destroyed in fewer than 4.

REPAIRS

Land a damaged Snowspeeder in a “valley,” and it’s instantly repaired. The Snowspeeder will change back to its original color to show that it has its full power again. Each Snowspeeder is allowed two repairs.
When your Snowspeeder is destroyed, the action stops for a moment. The next Snowspeeder will appear on screen. (You can start again whenever you're ready by pressing the direction disc.) The new Snowspeeder will pick up where the last one left off. That is, Walkers will be in the same positions and will show any damage they've already received.

So try to stay out of the Walker's line of fire. If you can, try to shoot down the Walker's missiles. That's right! If you can shoot down a missile (or get very close to it without its hitting you), the Walker's missile will explode.

**THE FORCE**

When you hear the Rebels' theme song and your Snowspeeder begins to flash, "The Force is with you." The Force will be with you for about 20 seconds. During this time, your Snowspeeder is all-powerful. It cannot be damaged; it cannot be destroyed. So when you gain The Force, move right in on an Imperial Walker and fire away! NOTE: If you've already had your Snowspeeder repaired and you gain The Force, you can have your Snowspeeder repaired twice more.

**END OF GAME**

The game ends when the lead Imperial Walker reaches the power generator—or—when the last of your Snowspeeders is destroyed.

To play again, press RESET, then press ENTER and select the appropriate number of players and the game level at which you wish to play.

**GAME VARIATIONS**

THE EMPIRE STRIKES BACK has 4 game variations. (See Game Selection Box.) Game variations are described as follows:

**Smart Bombs.**

Sometimes a bomb hatch will release a "smart bomb" that will actually follow your Snowspeeder. You can try to shoot it down for points or you can try to outfly it until it disappears from the screen. If a smart bomb hits your Snowspeeder it will either damage or destroy the Snowspeeder. (Smart bombs do more damage than missiles. So if your Snowspeeder is already damaged when hit by a smart bomb, the smart bomb will probably destroy it.)

**Solid Walkers.**

When you play a game with Solid Walkers, you're in for some precision flying. With Solid Walkers, you CANNOT fly your Snowspeeder into the Walker's body (although you can fly through its legs). If you do, your Snowspeeder will blow up—but not without weakening the Walker. Fly into a Walker weakened to blue, and the Walker is destroyed.

**TWO-PLAYER GAMES**

In a two-player game, players alternate as Rebel Snowspeeder commanders flying one Snowspeeder on a turn. The left player goes first. Each player's score is displayed throughout the game. The first player's score is to the left; the second player's score to the right.

- In a two-player game, when the lead Walker blows up the power generator, you're out of the game. Your opponent, however, may continue to play as long as he or she can defend the power generator.
**REBEL STRATEGY HINTS**

a) Remember to watch the radar band for the positions of all Walkers (especially the lead one) and to keep track of which Walker you’re battling on screen.

b) Try to weaken the LEAD Walker WITHOUT DESTROYING IT. If you do, the lead Walker will slow down the walking speed of all the others. This will give you more time to weaken and destroy the other Walkers before the lead one reaches the power generator.

Also try to weaken and slow down the LAST Imperial Walker on the radar band WITHOUT DESTROYING IT. This will help delay the entrance of new and tougher Walkers that replace the ones you destroy.

c) Try to get the Walker to track your Snowspeeder in one direction, then quickly move out of its line of fire and attack it from a safe position.

d) In a game with Solid Walkers, you may want to crash your Snowspeeder into the Walker’s body if you know you can’t destroy the Walker before it reaches the power generator. By doing so, you score 25 points and stay in the game—if you have Snowspeeders remaining in the battle.
